PROFESSIONAL SUMMARY

Cloud infrastructure professional with more than 10 years in IT, working across AWS and Google Cloud, infrastructure as code, CI/CD, containers, serverless services, and hybrid connectivity. Project experience spans FinOps reporting, secure analytics portals, cloud migration architecture, and AI-assisted operational automation. Uses Terraform, Python, and cloud services to support application delivery, data workflows, troubleshooting, and cost visibility.

TECHNICAL SKILLS

Cloud platforms: AWS: VPC, EC2, S3, RDS, Lambda, API Gateway, ECS, EKS, CloudFront, ALB, Route 53, IAM, Cognito, CloudWatch; Google Cloud: BigQuery, Cloud Composer

Infrastructure and delivery: Terraform, CloudFormation, Ansible; GitHub Actions, Argo CD, Jenkins, GitLab CI

Containers: Docker, Kubernetes, Amazon ECS and EKS, Helm, Kustomize

Operations and observability: CloudWatch, Prometheus, Grafana, ELK Stack; incident investigation, log analysis, deployment troubleshooting, cost and capacity analysis

Networking and integrations: VPCs, peering, hybrid connectivity, DNS, security groups, NACLs, REST APIs, SQS, SNS, Salesforce integrations

Automation and data: Python, Bash, SQL, Apache Airflow; Amazon RDS, MySQL, Oracle 19c

Systems: RHEL, Ubuntu, Windows Server, Active Directory, Google Workspace

PROFESSIONAL EXPERIENCE

Cloud Systems Specialist | LG CNS

2024 - Present | São Paulo, Brazil

- Build and maintain AWS infrastructure for new applications across development, staging, and production environments using Terraform and reusable infrastructure modules.
- Implement and maintain CI/CD workflows with GitHub Actions and Argo CD; work with Kubernetes manifests and Helm charts for application deployment on Amazon EKS.
- Support containerized and serverless applications using ECS, Lambda, API Gateway, and related AWS services; investigate deployment, configuration, IAM, and authentication issues.
- Work on API and Salesforce integrations, troubleshooting service communication, credentials, and application logs across cloud components.
- Support Google Cloud data workflows using BigQuery and Cloud Composer; investigate Airflow DAG dependencies, imports, configuration, and task failures.
- Configure monitoring, dashboards, logs, and alerts with CloudWatch, Prometheus, and Grafana to support incident investigation and application operations.
- Maintain hybrid connectivity and cloud networking, including VPC peering, DNS, security groups, and NACLs; review resource utilization and cloud costs.
- Collaborate with development teams on production incidents, infrastructure changes, and deployment validation.

SELECTED PROJECTS AT LG CNS

FinOps cost visibility and reporting

Developed project and account cost views with monthly selection, chargeback metadata, and Excel-compatible exports. Aligned dashboard and export calculations to a shared cost model, supporting consistent financial reporting across projects and environments.

AWS, S3, CloudFront, financial data integration, automated validation.

CDP Analytics Library

Developed and evolved an authenticated analytics portal for reports and business insights. Supported Terraform-managed AWS infrastructure with Cognito, CloudFront, S3, API Gateway, Lambda, and SES, including authenticated notifications and controls against direct API access.

Vue 3, Terraform, Cognito, CloudFront, API Gateway, Lambda, SES.

Sales ADM Portal cloud migration architecture

Prepared current-state and target-state architecture diagrams and executive presentations for a proposed migration from on-premises infrastructure to AWS. Documented architecture options and cost considerations to support technical and business review.

AWS architecture, hybrid integration planning, cost assessment, technical documentation.

Hybrid AWS and on-premises connectivity

Worked on AWS Client VPN, Transit Gateway, DNS, routing, and security controls for hybrid access. Optimized Route 53 Resolver infrastructure costs while preserving Client VPN connectivity; assessed service-level reverse-tunnel options where inbound network access was restricted.

Terraform, AWS Client VPN, Transit Gateway, Route 53 Resolver, Linux networking.

AI-assisted operations and reporting

Developed an AIOps workflow using Amazon Bedrock tool calling to generate incident and best-practice recommendations from operational snapshots and runbooks. Implemented validation of generated recommendations, read-only agent tools, and asynchronous snapshot delivery. Integrated authenticated reporting data with Lambda workers and DynamoDB snapshots.

Python, Amazon Bedrock, Lambda, DynamoDB, REST APIs, operational monitoring.

PREVIOUS EXPERIENCE

Cloud Administrator & Application Operations Lead | Algar Tech

Sep 2019 - 2024 | São Paulo, Brazil

- Led the migration of critical Epson do Brasil applications from on-premises infrastructure to AWS, supporting connectivity and application operations during the transition.
- Maintained AWS environments using VPC, EC2, RDS, S3, Lambda, CloudWatch, and Elastic Beanstalk for production workloads.
- Refactored Terraform configurations into reusable modules and used Terraform and CloudFormation to make infrastructure provisioning repeatable across environments.
- Configured hybrid networking between the data center and AWS, and supported monitoring, logging, alerting, and incident resolution.
- Administered RHEL Linux, Windows Server applications, Oracle 19c, and MySQL; performed capacity planning and cloud cost analysis.

Infrastructure Technician & Team Lead | Randstad

Dec 2016 - May 2019 | São Paulo, Brazil

- Led a team of 10 field technicians, providing technical guidance and coordinating IT service delivery.
- Administered Active Directory and Google Workspace, including user access, permissions, and security policies.

Infrastructure Technician | Capgemini

Oct 2013 - Dec 2016 | São Paulo, Brazil

- Administered Active Directory, DNS, DHCP, and WSUS in enterprise environments.
- Performed preventive maintenance and investigated infrastructure incidents to support service availability.

EDUCATION

MBA in Cloud Computing & Architecture | FIAP
Expected October 2026

Bachelor's Degree in Information Technology Management | FAC São Roque | 2014

CERTIFICATIONS

AWS Certified Solutions Architect - Associate | Amazon Web Services | 2024

HashiCorp Certified: Terraform Associate | HashiCorp | 2023

AWS Certified Cloud Practitioner | Amazon Web Services | 2022

Microsoft Azure Fundamentals (AZ-900) | Microsoft | 2023

Oracle Cloud Infrastructure Foundations | Oracle | 2023

Oracle Cloud Data Management Foundations | Oracle | 2023

PROFESSIONAL DEVELOPMENT

AI Engineering: ongoing independent study.

Additional areas of study: Apache Kafka / Amazon MSK, Datadog, and OpenTelemetry.
